OBJECTIVE

To apply my skills and knowledge in a challenging environment, contribute to the growth of the organization, and continuously improve myself both professionally and personally.

EDUCATION

B. Tech Vardhaman College of Engineering (Grade: -)	2023 – Present Hyderabad, Telangana
--	--

Intermediate Narayana Junior College (Grade: 8.45)	2023 Hyderabad, Telangana
---	------------------------------

SSC Kendriya vidyalaya (Grade: 8.36)	2021 Hyderabad, Telangana
---	------------------------------

PROJECTS

RoadMate App

- Developed multi-service app with Java (Android Studio) frontend and Python backend for driver hiring, mechanical assistance, and tourist guidance.
- Designed Figma UI; integrated real-time GPS for enhanced navigation, convenience, and safety.

CPU Cooling System Using Arduino

- Built Arduino-based system with sensors to monitor CPU temperature and automate fan/liquid cooling.
- Reduced overheating and energy use by 15%, boosting CPU performance and longevity.

CERTIFICATIONS

- MATLAB Onramp, Image Processing Onramp & Signal Processing Onramp – MathWorks
- Data Science for Engineers – NPTEL (IIT Madras)
- TCS iON Career Edge – Young Professional
- Practical GitHub Actions – LinkedIn Learning
- Hugging Face Projects – Simplilearn
- Hands-on Web Development with Django – CodeTantra

EXTRA-CURRICULARACTIVITIES

SmartIndia Hackathon 2k23 [Participant] • Participated in a national-level hackathon organized by the Ministry of Education, collaborating with a team to develop innovative solutions for real-world problems.	2023
---	------

TEDxVCE [Participant] • Contributed to TEDxVCE events at Vardhaman College of Engineering, engaging in discussions on innovative ideas and leadership.	2025
--	------

Savisakar-2k23 [Participant] • Participated in Saviskar 2k23, a technical & innovation event, actively engaging in knowledge-sharing sessions and showcasing interest in technology and engineering.	2023
--	------

TECHNICAL SKILLS

- **Languages:** Python, C, Verilog, Matlab
- **Tools:** LaTeX, VS Code, GitHub
